

Gianmarco Tutuianu

Business Development Manager ♦ Programmatic Advertising & Applied AI

gipinze@gmail.com • +358 45 123 9430 • Helsinki, Finland • linkedin.com/in/gipinze • github.com/gipinze

Business development professional who bridges commercial strategy and hands-on technical execution in programmatic advertising and publisher monetization, backed by an applied AI/ML and computer vision research background. Equally comfortable in partner negotiations and revenue analysis as in ad-delivery code and CMS integration.

EXPERIENCE

Business Development Manager

2023 – Present

Neuwo Oy (formerly Kiosked Oy Ab), Helsinki, Finland

- Lead publisher monetization and hands-on technical ad integration - implementing ad placements across diverse CMS platforms (WordPress, Arc/Fusion) and debugging delivery issues such as async widget rendering and embed anchoring conflicts.
- Built an internal Chrome extension for mocking ad placements ahead of development, shortening placement review cycles.
- Coordinate with ad operations and demand partners to optimize CPMs, fill rates, and revenue using Google Ad Manager and Equativ; drive publisher onboarding across Latin American markets.
- Conduct market and revenue analysis to support commercial decisions and partner negotiations.

AI & Computer Vision Research Trainee

2022 – 2023

Haaga-Helia AMK & Forum AI, Helsinki, Finland

- Developed and evaluated CNN architectures for image classification and recognition using TensorFlow, YOLO, and OpenCV.
- Co-authored an IEEE research paper on CNN architecture design, evaluation methodology, and real-world performance (doi.org/10.48550/arXiv.2311.02910).

Sales Manager

2018 – 2019

ZenTreasury Oy, Espoo, Finland

- Led sales for the Spanish-speaking market across Latin America and Spain; localized marketing materials, website content, and software for regional markets.

Logistics CRM Developer Trainee

2018 – 2018

Ecker ♦ Line Oy, Helsinki, Finland

- Researched and homologated client data to support a new CRM system (SuperOffice), giving sales representatives a 360 ♦ view of client information.

PROJECTS

Rugby Player Tracking System

real-time tracking and homography-based performance analysis with YOLOv8 and BoT-SORT.

YOLOv8, BoT-SORT

AI-Powered Pok ♦ dex App

fully offline, camera-based recognition built with TensorFlow.js and MobileNet.

TensorFlow.js, MobileNet
